

Dr. Kevin F. Brown and the team at My Dental Home offer excursions to young learners to tour a dental office. The goal is to help children foster an enjoyable and educational dental experience. The program allows children to visit a dental practice in a comfortable, family friendly environment. This visit is fun, especially when the student can share it with their school comrades. The program is geared to children of all ages and teaches proper brushing techniques, basic dental disease knowledge and healthy food choices. Parents are always welcome to attend.

The Ontario Dental Association recommends that children see a dentist before their first birthday, so we have also developed an infant/toddler program to educate both children and parents about oral health.

Alternatively, if an office visit does not suit you, we would be happy to offer the option of a hygienist coming to your school or interest group to provide preventive education to the students. These programs are available at no cost since we are dedicated to the community we serve and the prevention of dental disease. Dr. Kevin F. Brown and Associates have been providing dental care to the community for over 25 years. We welcome new patients and are always willing to provide educational programs to the community. The hygienist would present a fun-filled interactive session centered on healthy food choices, how to care for teeth and gums, and answer any questions. April is Dental Health Month, and in celebration, we are offering dental health loot bags for the entire month.

We invite you to call us at (905) 415-7700 to learn more or to arrange a tour. More information on My Dental Home can be found on our website: [www.mydentalhome.com](http://www.mydentalhome.com).

Yours in better dental health,
